PVill

Page-by-page mockups

Many journeys. One village. Phone-sized wireframes for the first build. Ticket numbers on each screen match the 24-ticket list. Every person, organization, and number is made up for the demo.

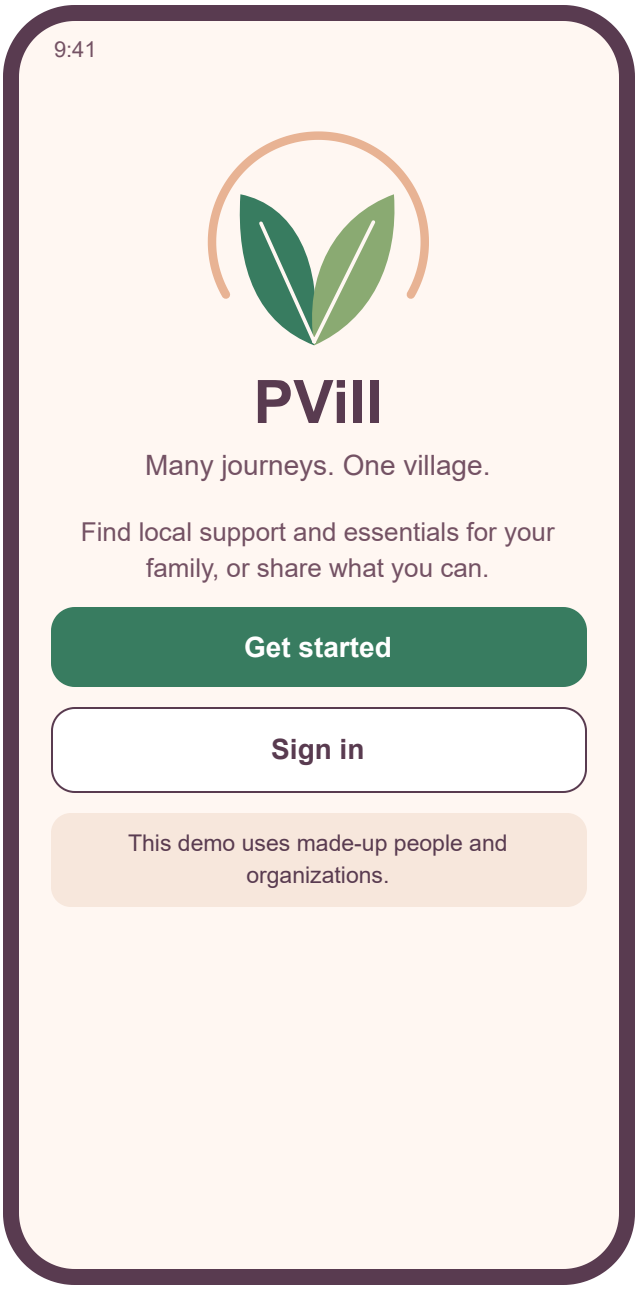

- Deep Plum 89, 59, 80
- Dusty Rose 180, 111, 124
- Soft Peach 232, 179, 148
- Forest Green 56, 124, 96
- Sage Green 138, 170, 114
- Warm Ivory 255, 247, 242

How to read these pages

1. **Green buttons** are the main action on each screen.
2. Demo marks a step that shows the plan but does not really send anything.
3. Verified means the organization confirmed its email. Person marks an item from an individual.
4. Exact addresses for people stay hidden until the giver approves a claim.

A. Getting started

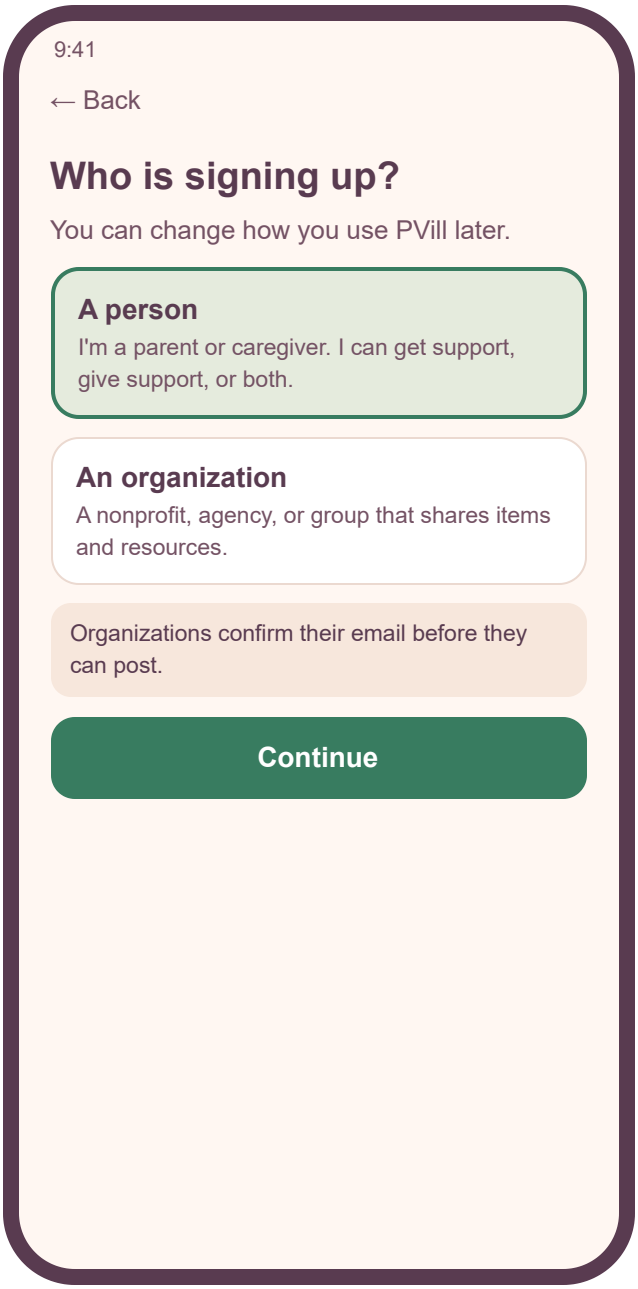

Welcome, choose an account type, and build a person profile.

1. Welcome

Ticket 2

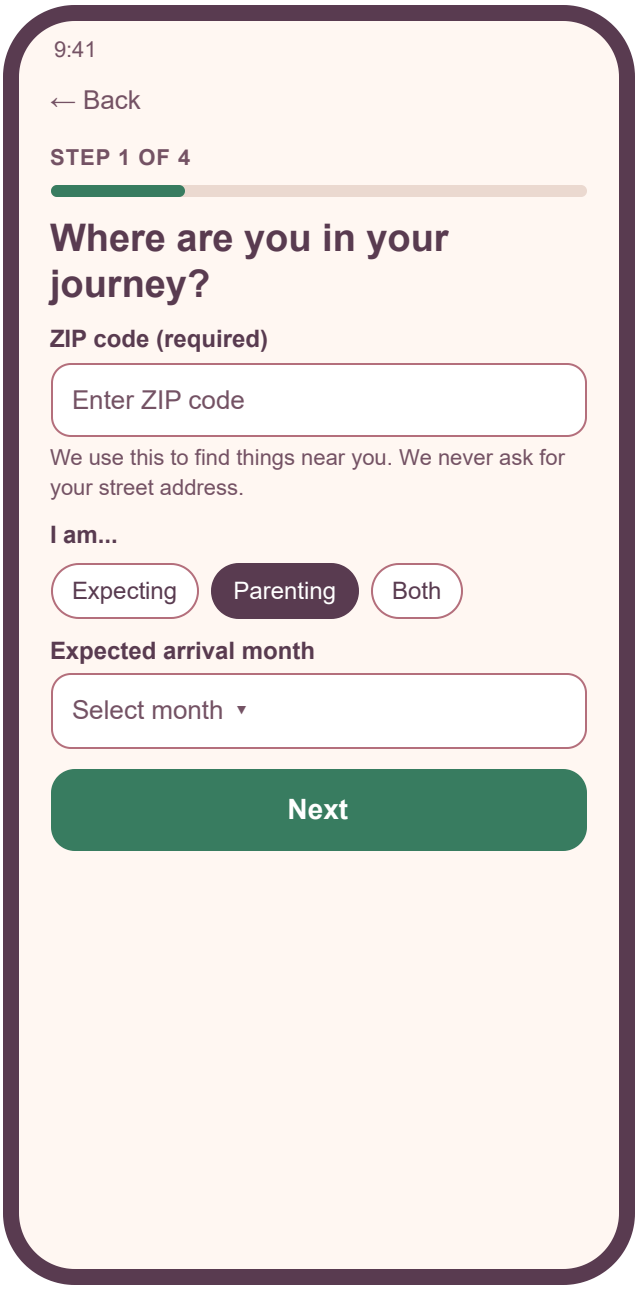

One clear promise, one main button. Sign in is a quiet second choice.

2. Choose an account type

Ticket 2

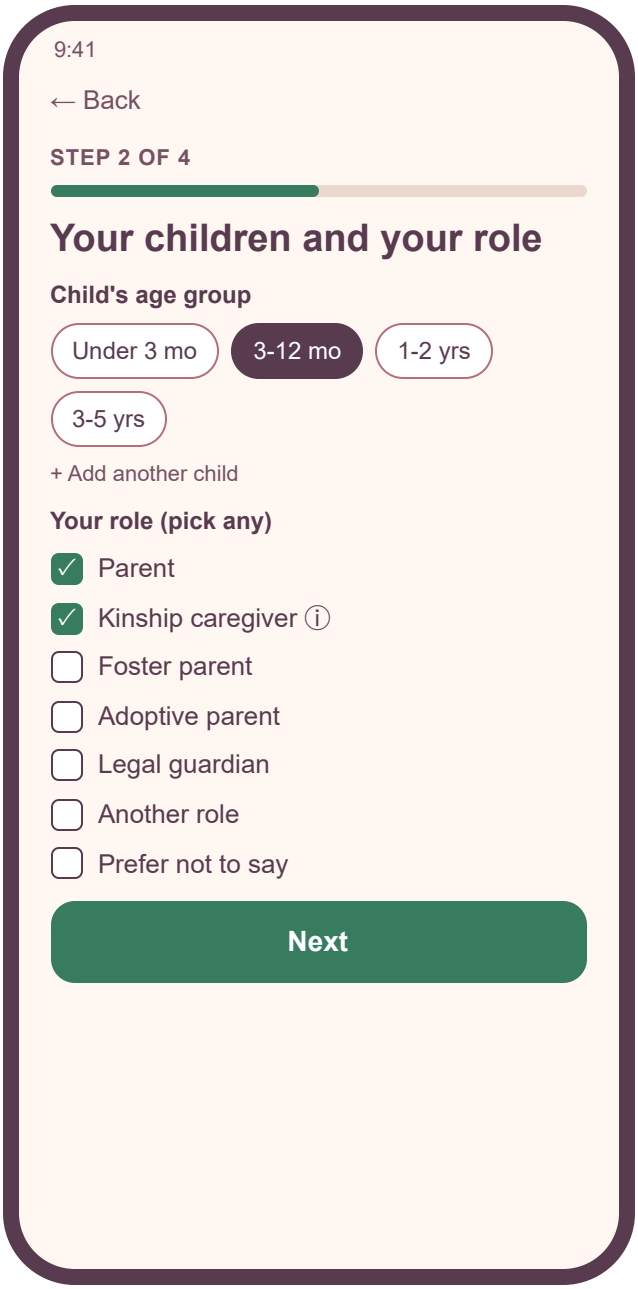

Two choices only. Selected card has a green outline.

3. Profile: area and journey

Ticket 3

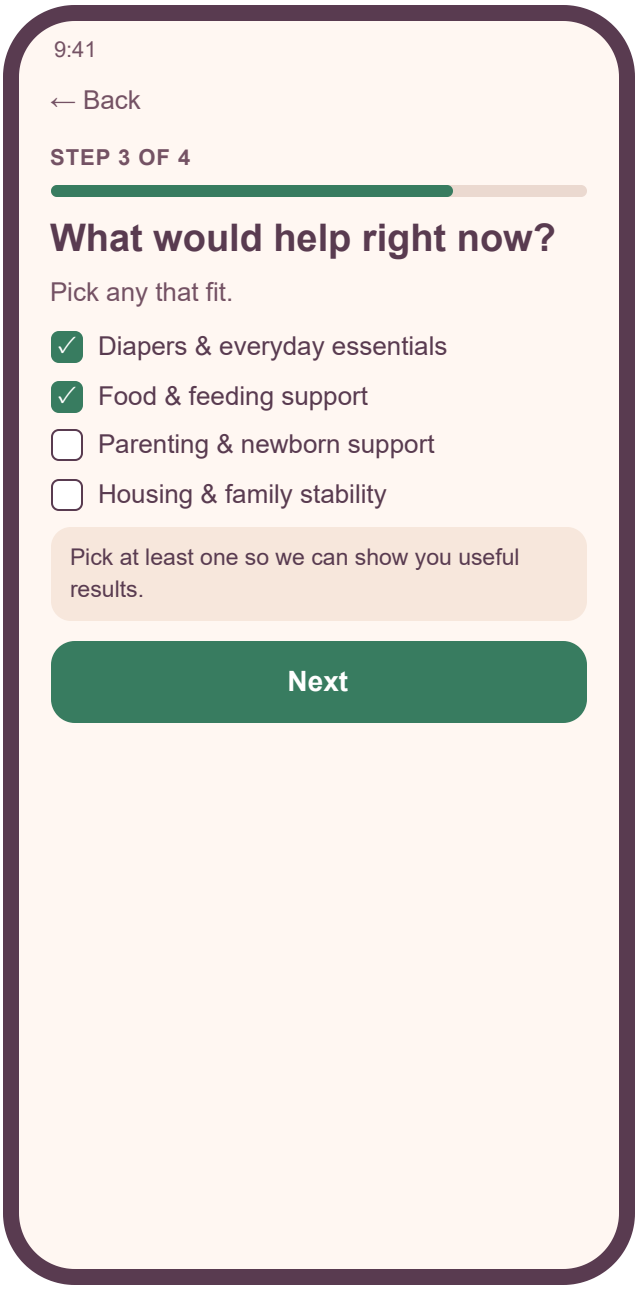

Only ZIP code is needed to start. Required questions are marked.

4. Profile: children and roles

Ticket 3

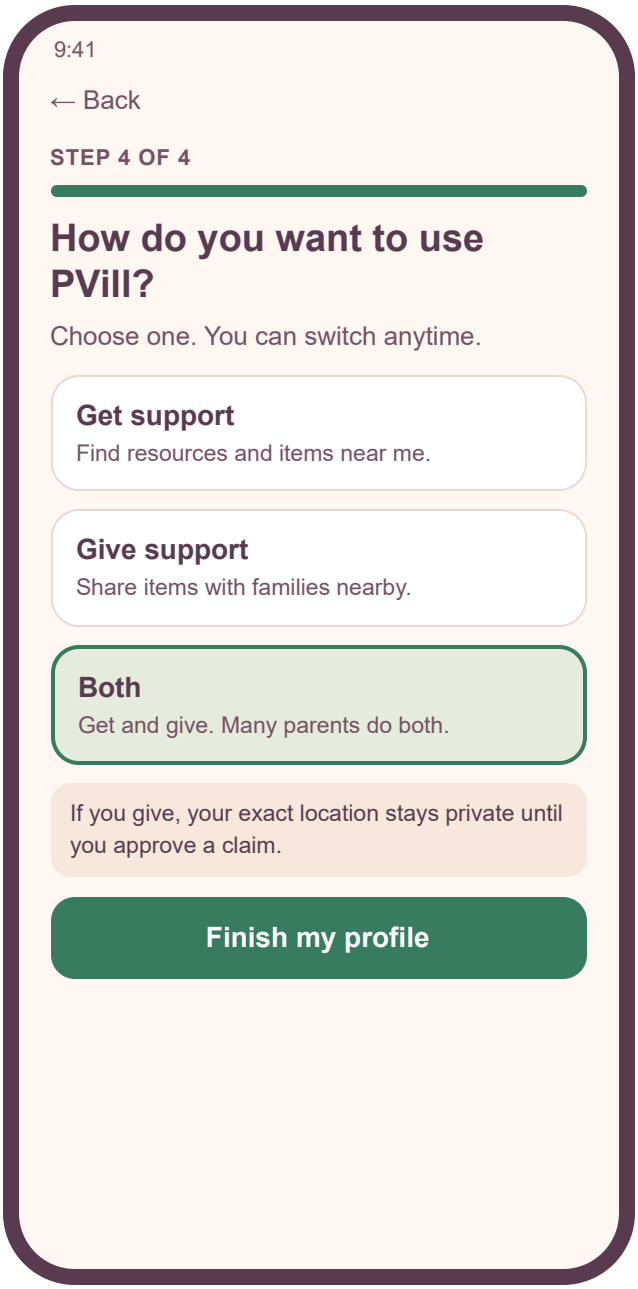

Roles allow more than one choice. Tapping ⓘ explains: "You care for a relative's or close family friend's child." Prefer not to say clears the others.

5. Profile: needs

Ticket 3

The same four categories are used in search and on resource cards.

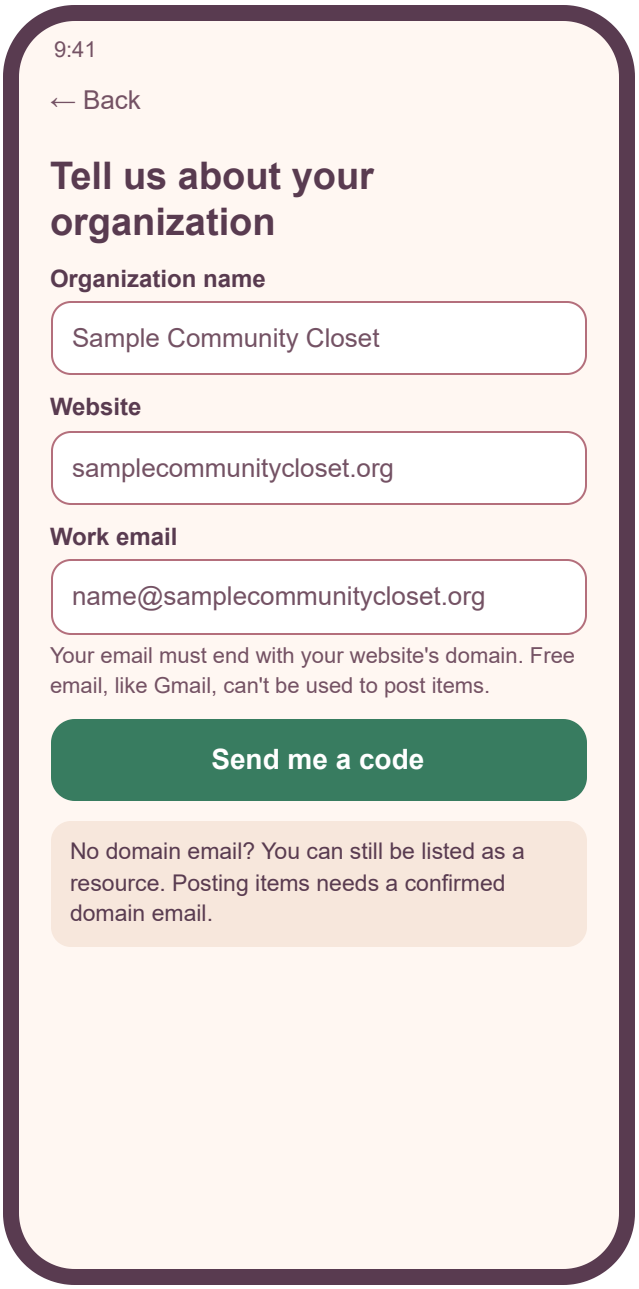

6. Profile: how to use PVill

Tickets 3, 21

This is where a person becomes a receiver, a giver, or both.

B. Organizations

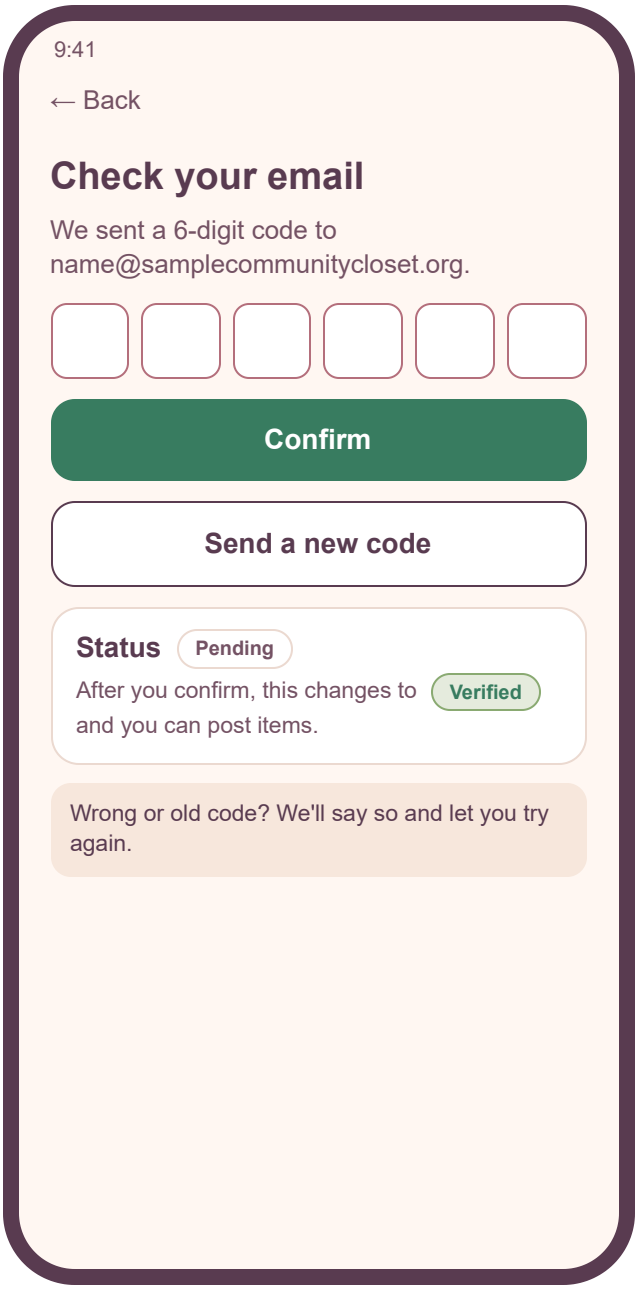

Email confirmation and the organization profile.

7. Organization sign-up

Ticket 4

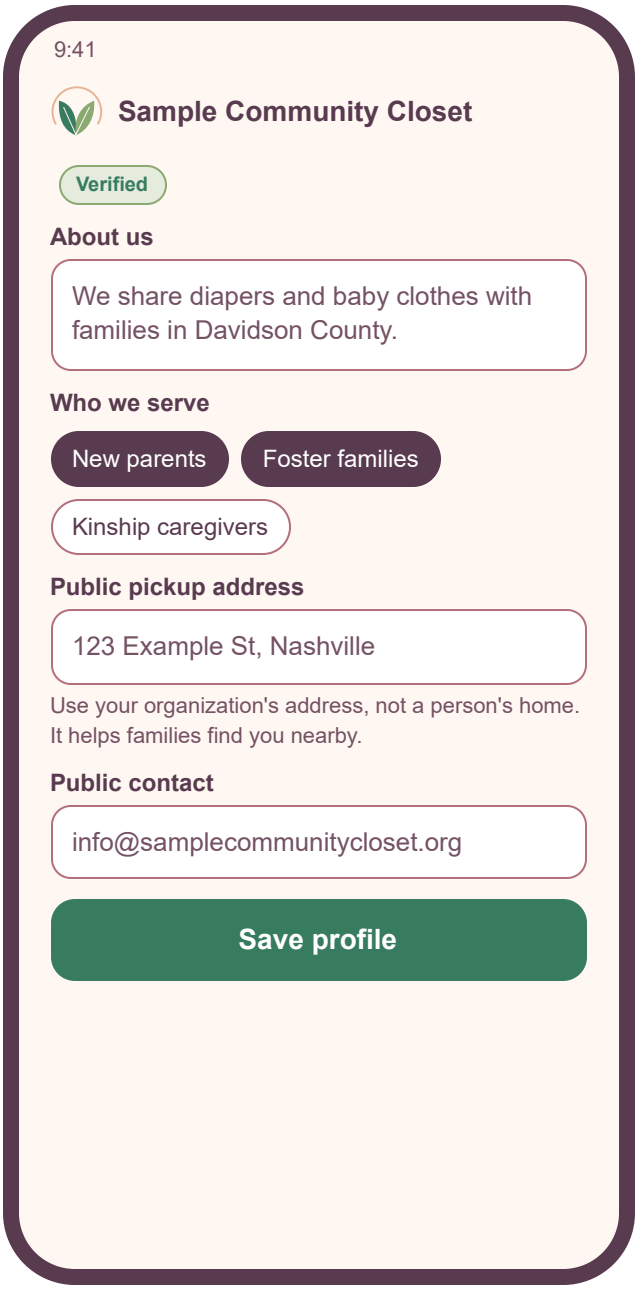

The email check runs before anything else.

8. Enter the code

Ticket 4

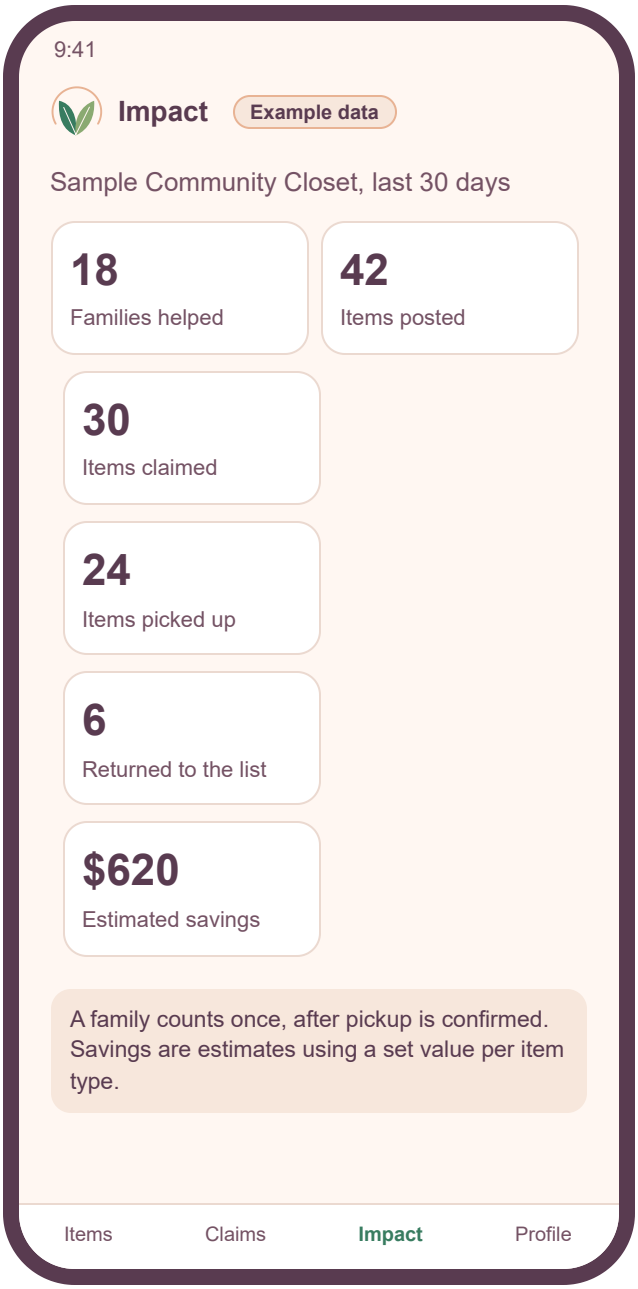

Pending until the code is confirmed. Only verified organizations can post.

9. Organization profile

Ticket 5

The address puts the organization in "near me" results.

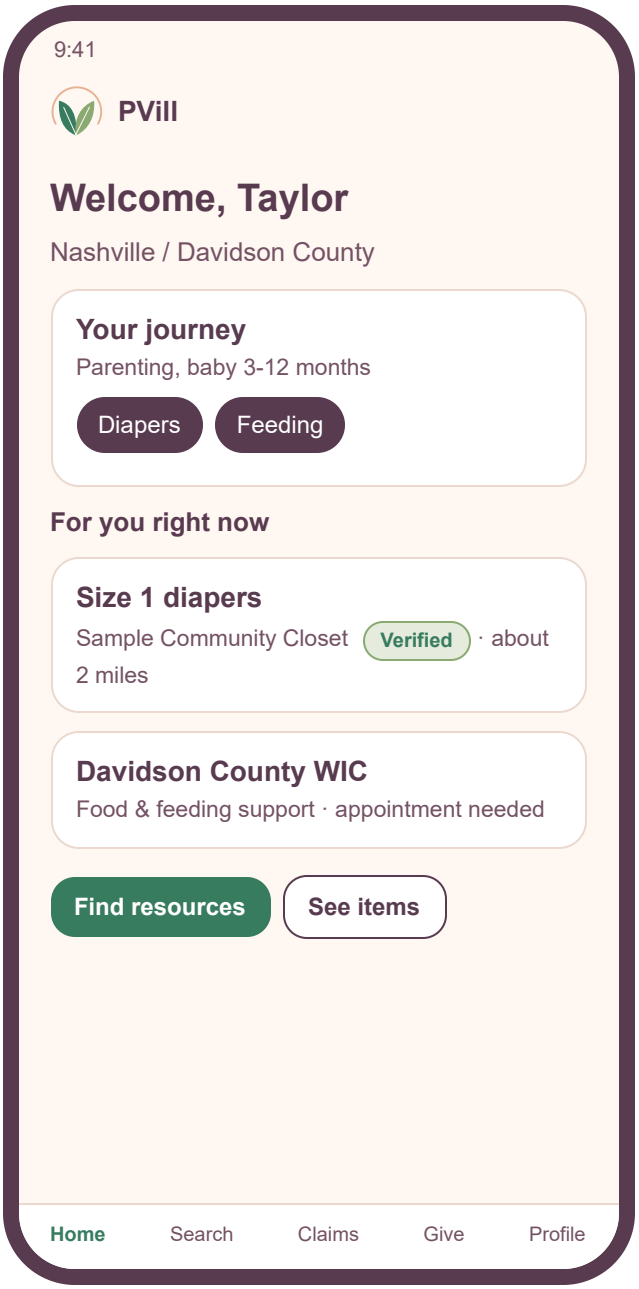

10. Impact numbers

Ticket 20

Gives organizations and sponsors one simple summary.

C. Finding and claiming

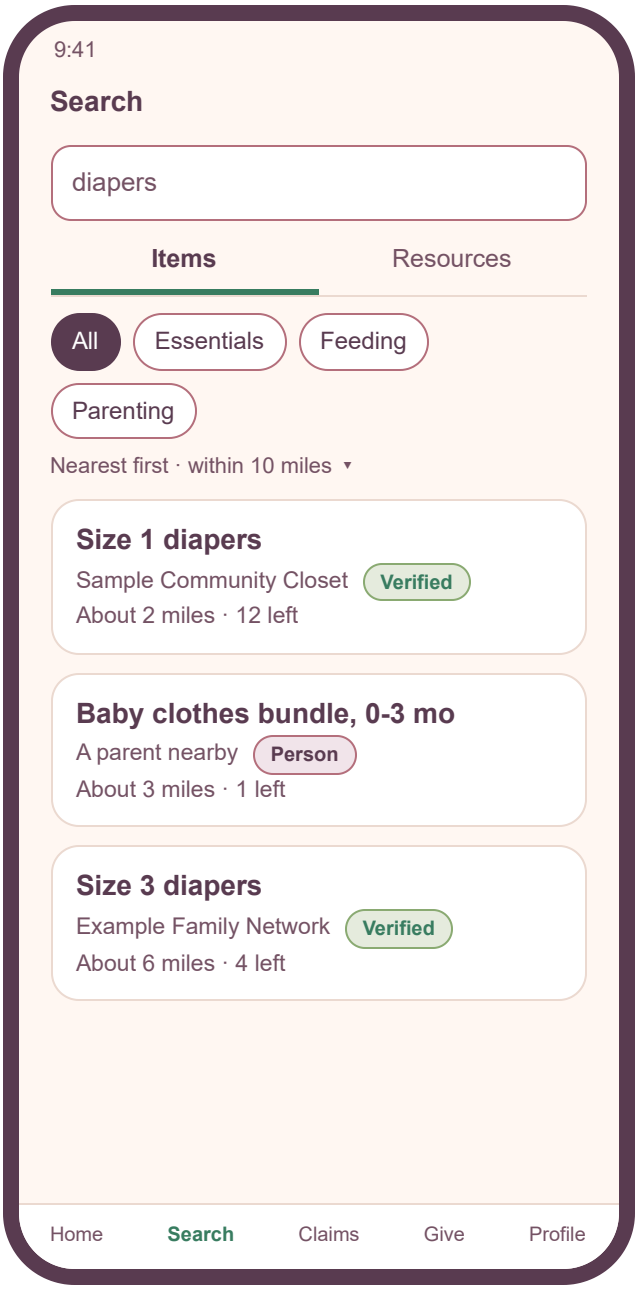

Home, search near me, item details, and claims.

11. Home

Ticket 22

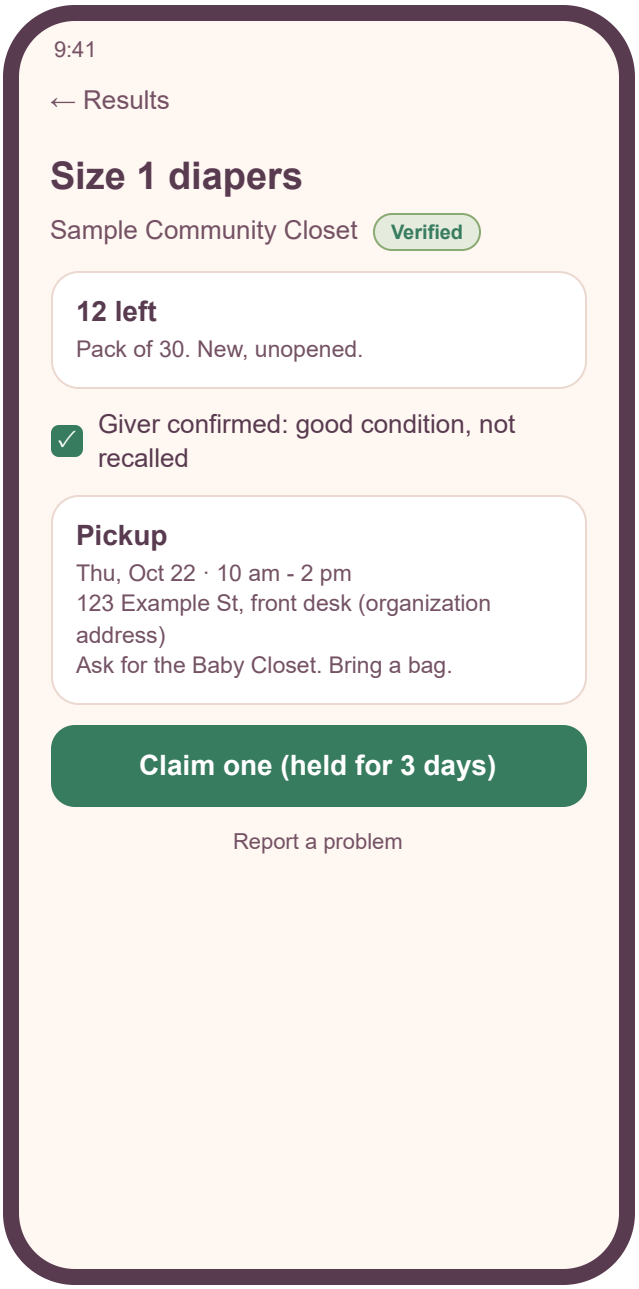

Built from the person's own answers. People who give also see My items.

12. Search near me

Ticket 12

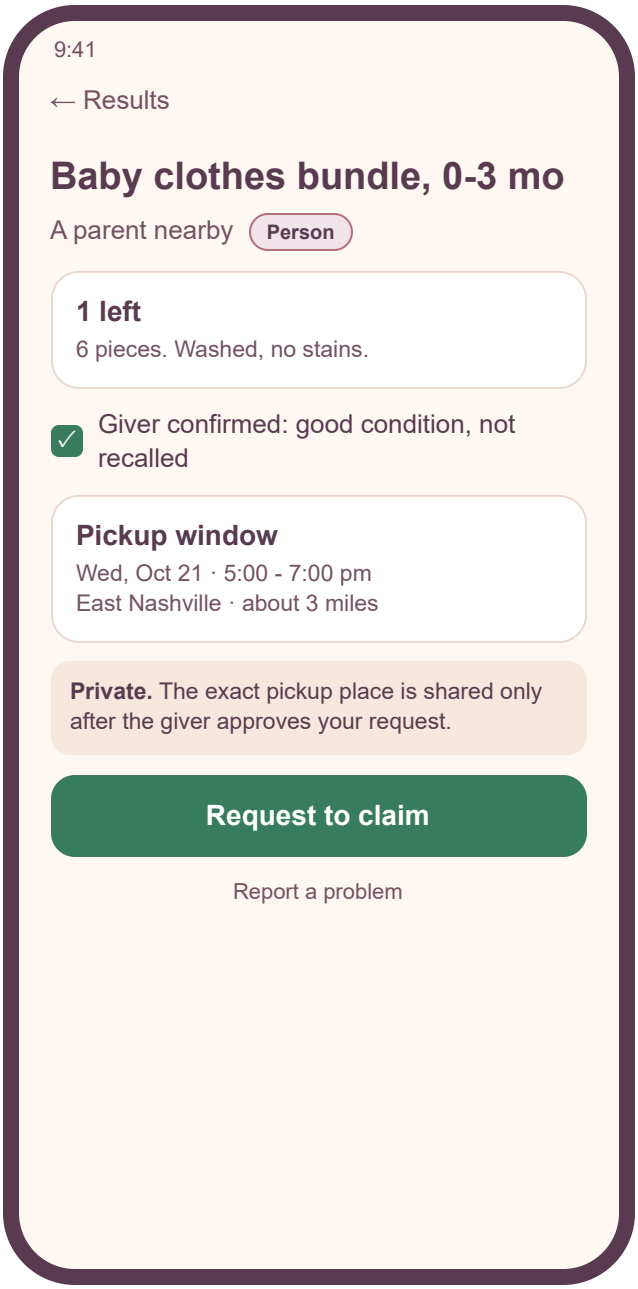

Switch between Items and Resources. Distances are rounded, never exact.

13. Item details: organization

Tickets 9, 14

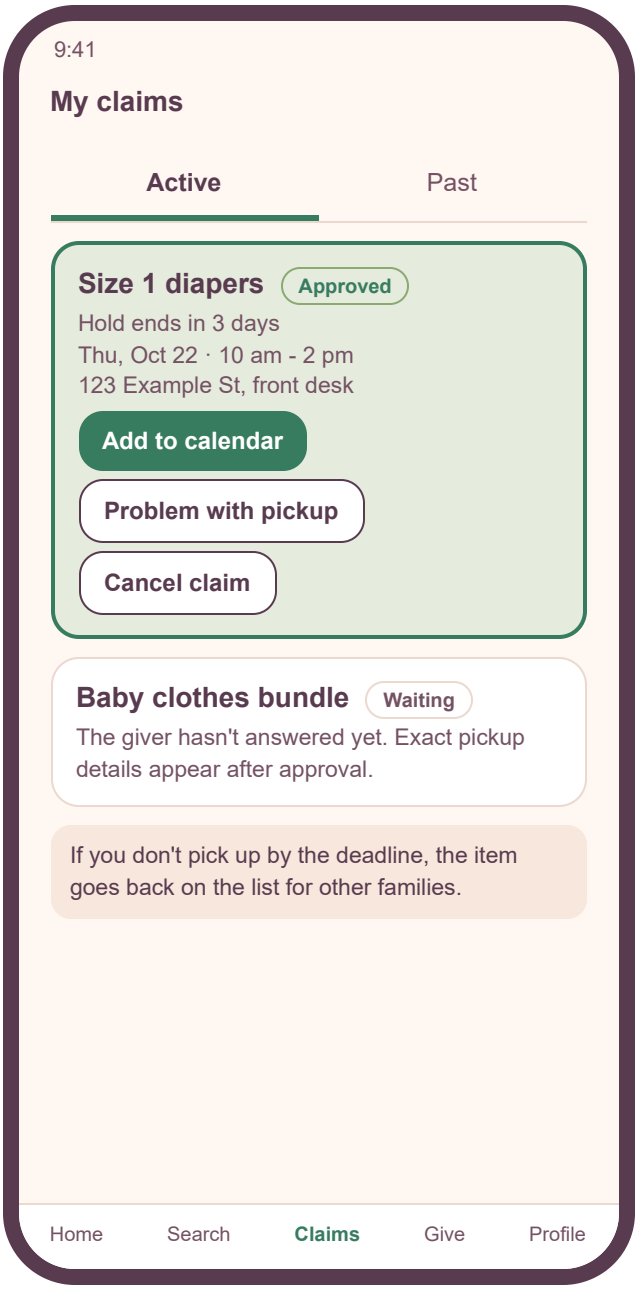

An organization's address is public. Claims on organization items are approved automatically.

14. Item details: person

Tickets 8, 9, 14

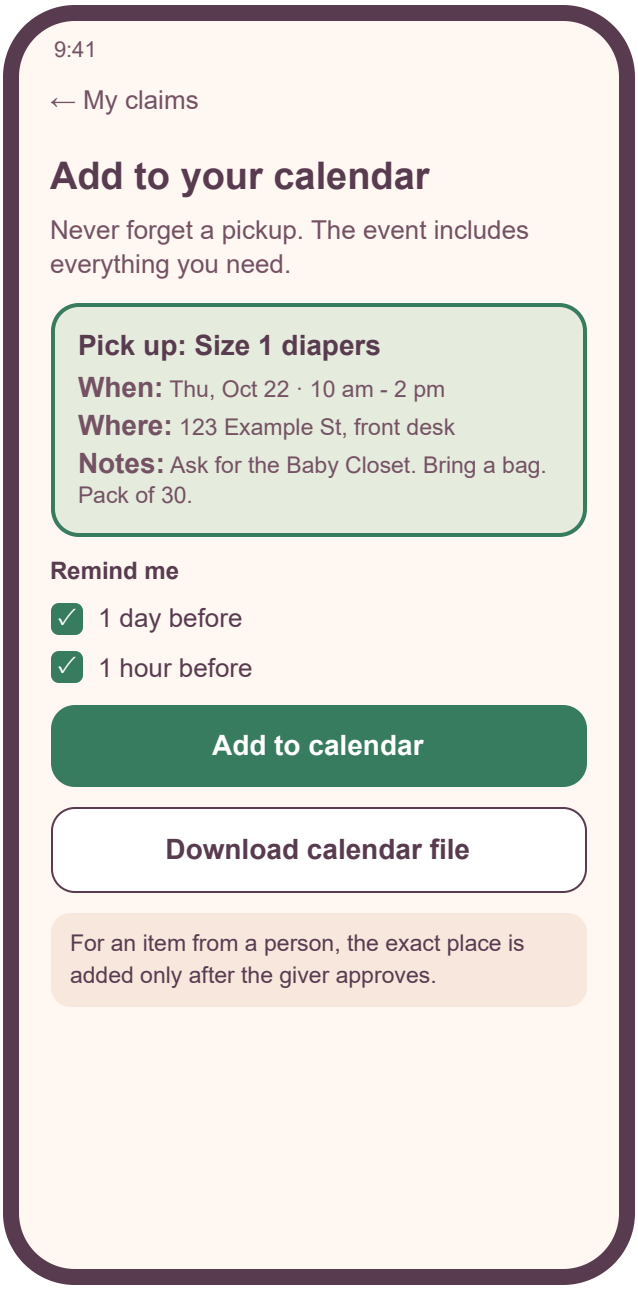

No street address, no exact distance, no full name.

15. My claims

Tickets 9, 11

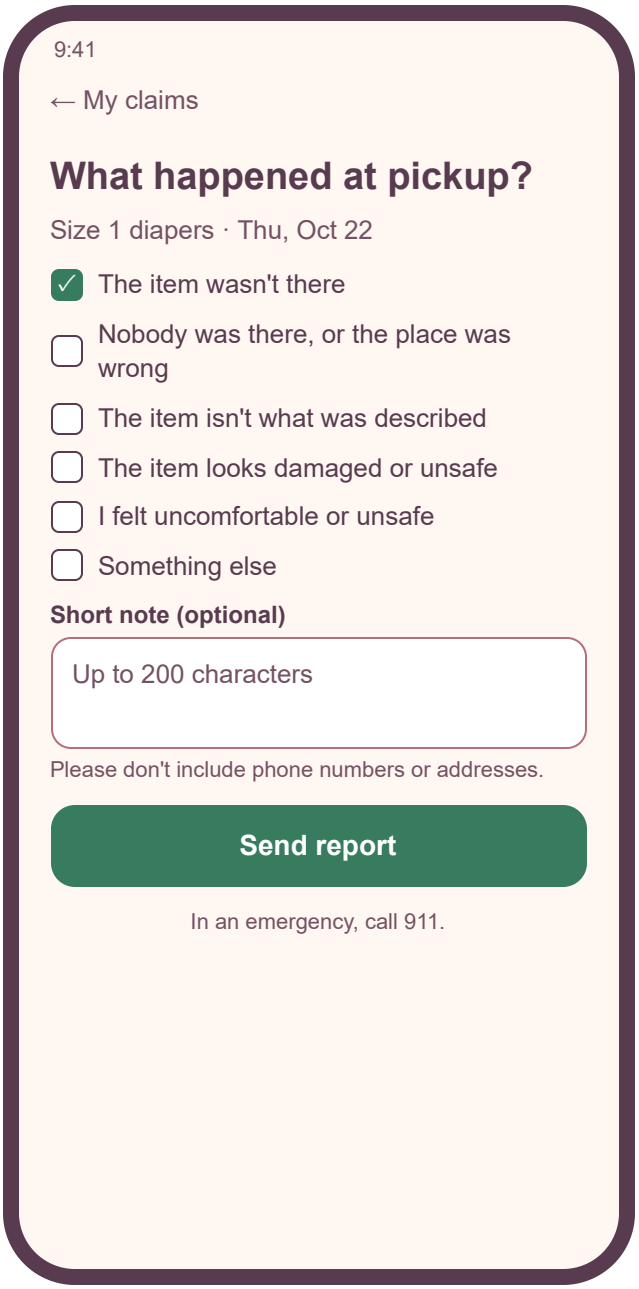

Two states side by side: approved (details shown) and waiting (details hidden).

16. Add to calendar

Ticket 16

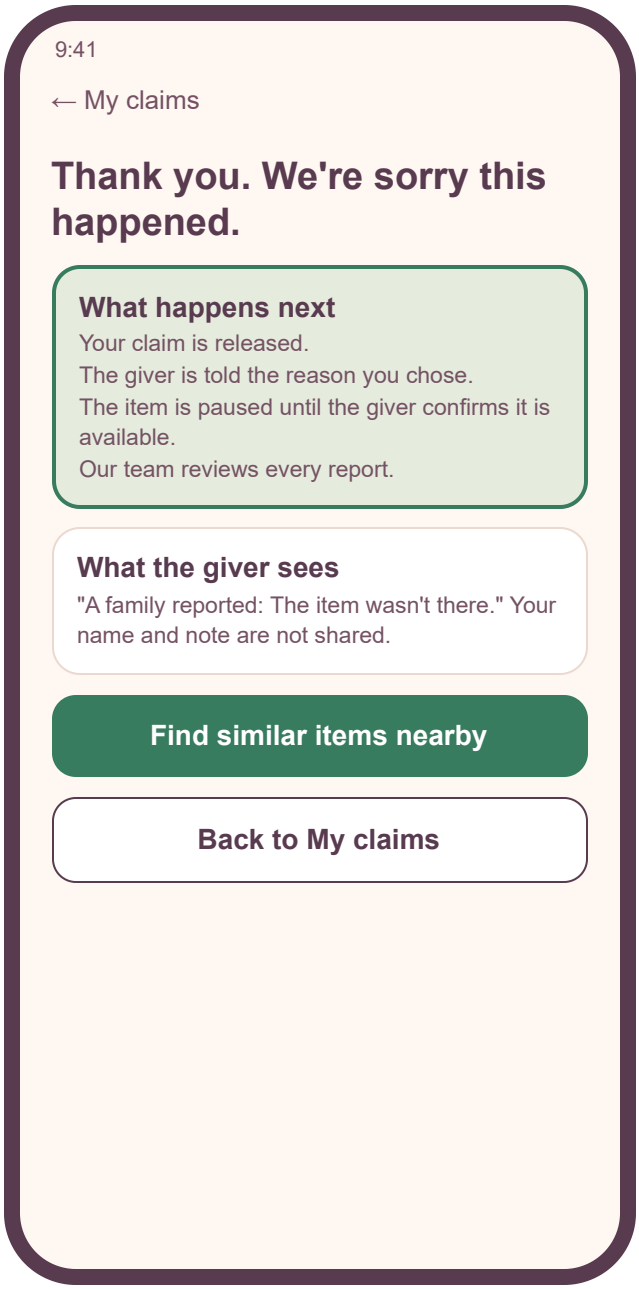

Replaces the demo reminders. The calendar event carries the date, time, place, and the poster's notes, with reminder alerts built in.

17. Report a pickup problem

Ticket 17

The only way to reach the giver. A fixed list of reasons, no open chat. Shown from the start of the pickup window until 1 day after (proposed).

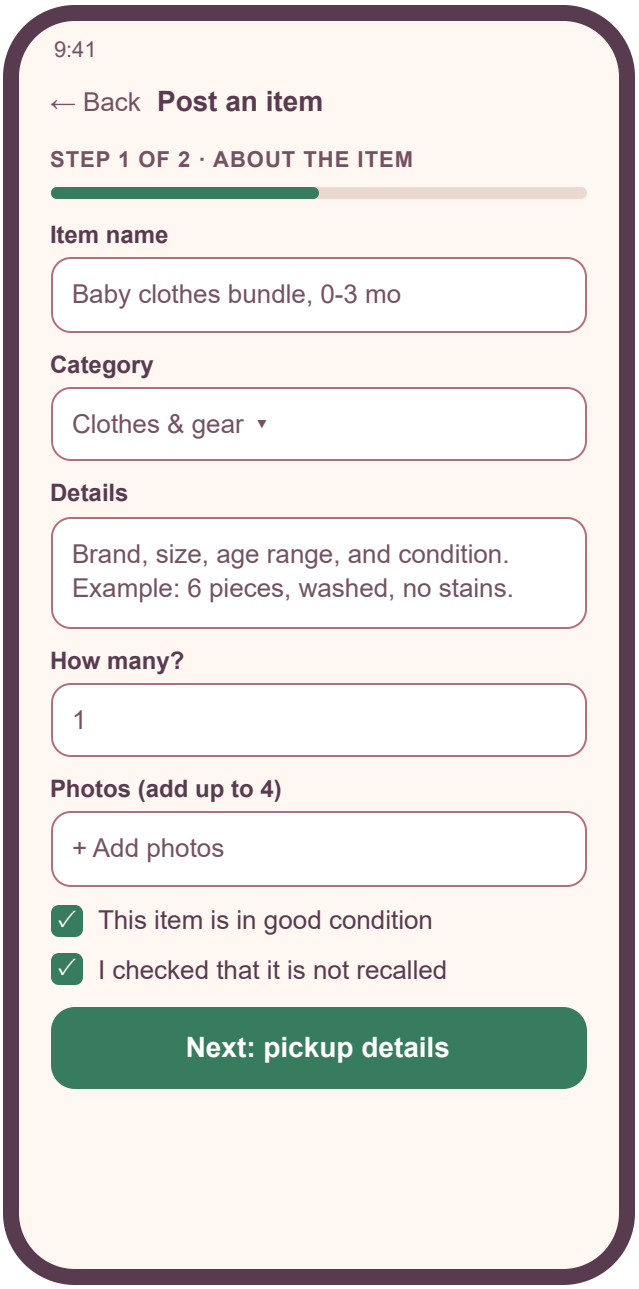

18. After a pickup report

Ticket 17

Clear next steps. The giver can also tap "Family didn't come" on My items to release the item early.

D. Giving

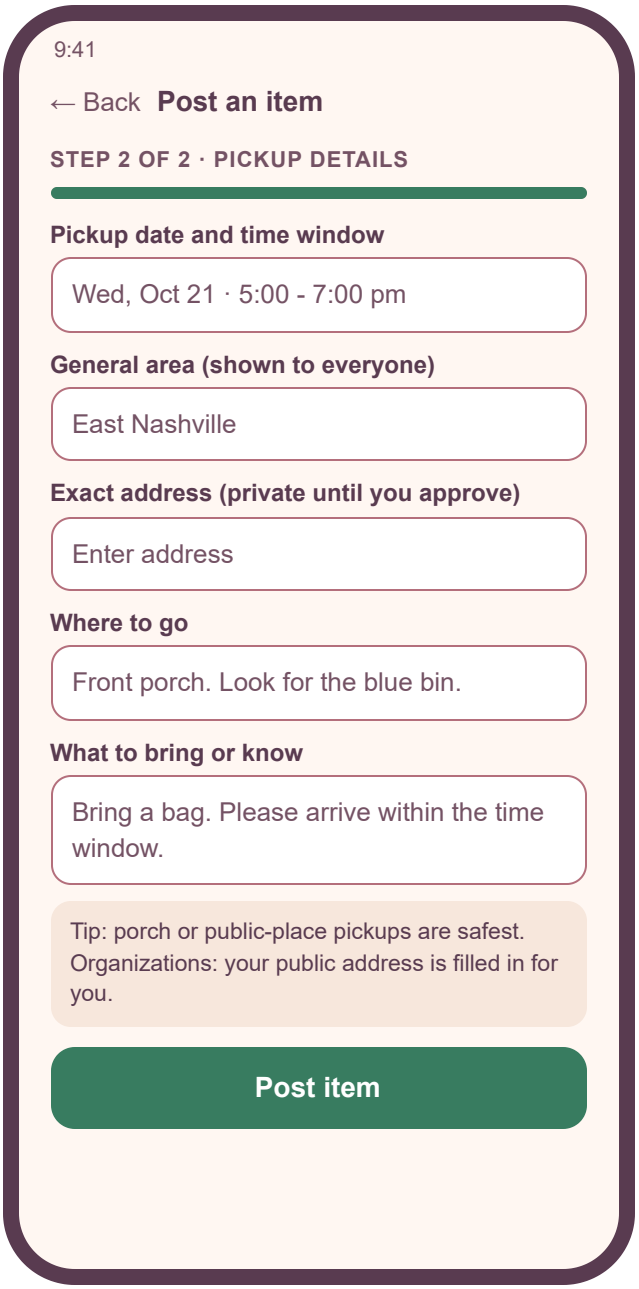

Posting items, approving claims, and managing what's left.

19. Post an item: about the item

Ticket 6

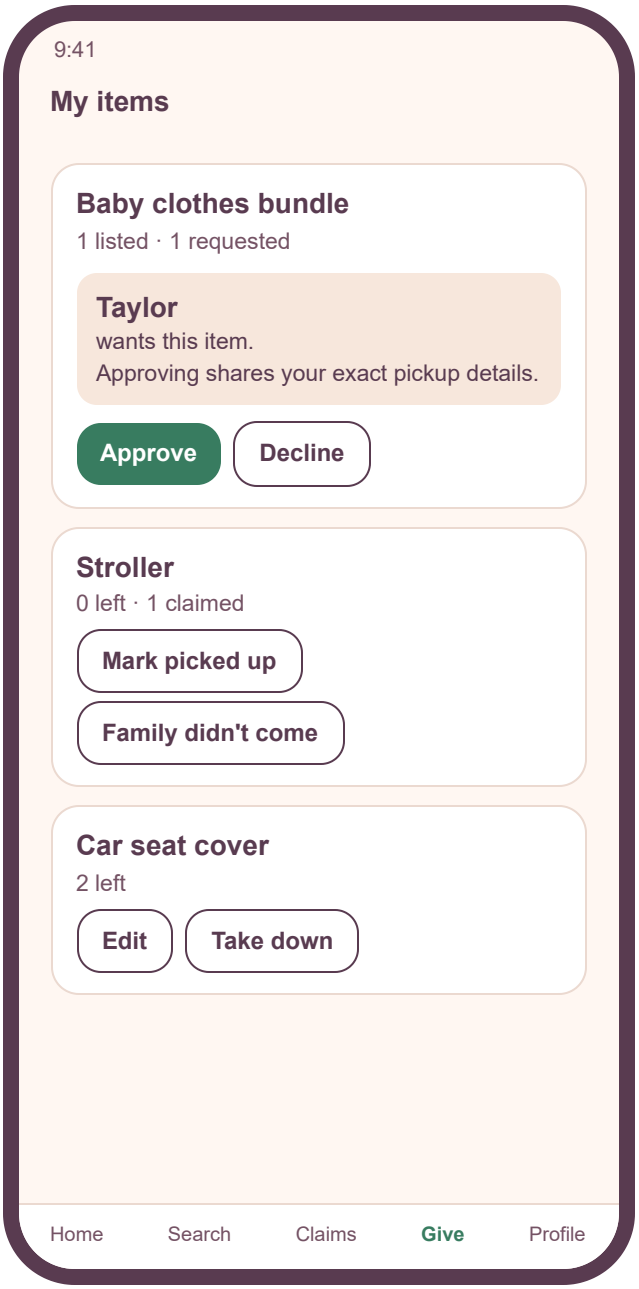

Same form for organizations and people. Both checkboxes are required. Not allowed: breastmilk, medicine, and other health-sensitive items.

20. Post an item: pickup details

Tickets 6, 8

The poster adds as much detail as possible, because there is no chat. Time and area are public. The exact address is hidden until a claim is approved.

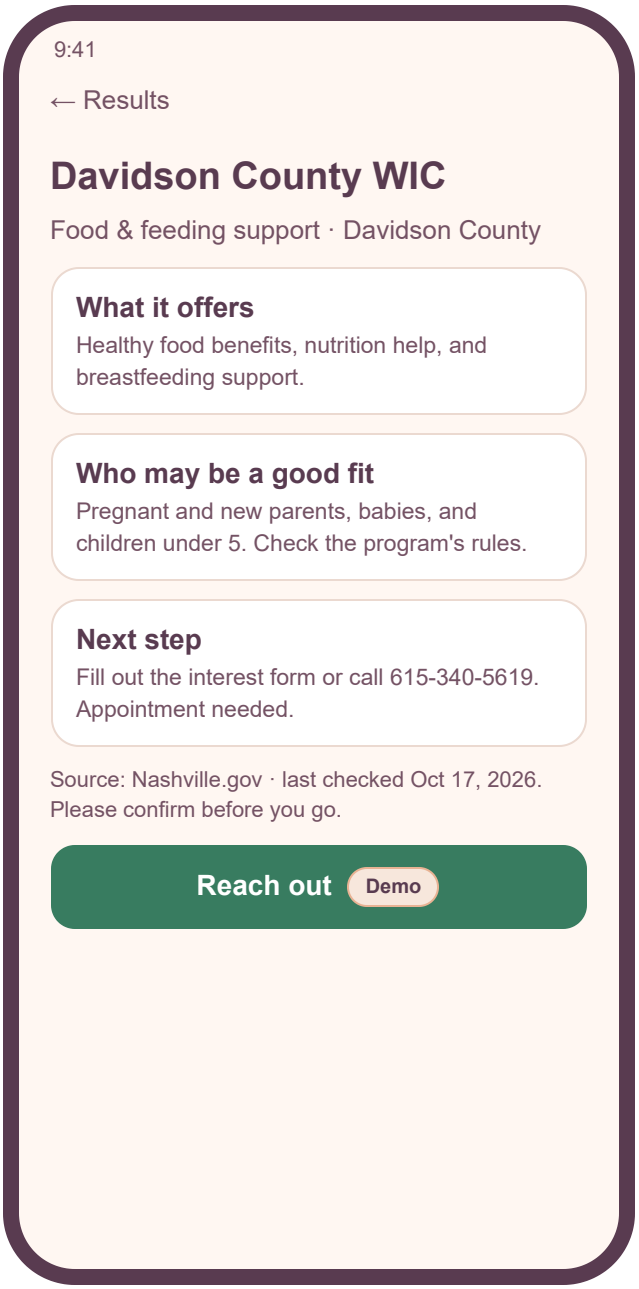

21. My items and claim requests

Tickets 7, 10

Only a first name is shown. Quantity can never go below zero.

E. Resources, trust, and settings

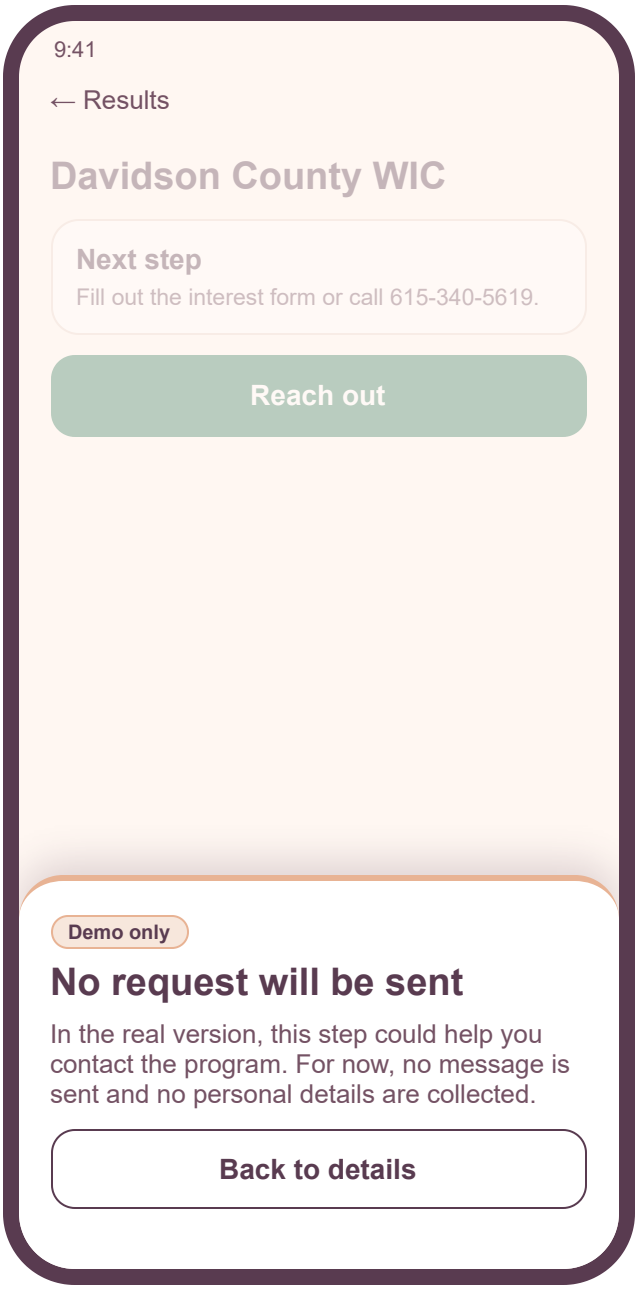

Resource details, the Reach out demo, reporting, and editing a profile.

22. Resource details

Ticket 15

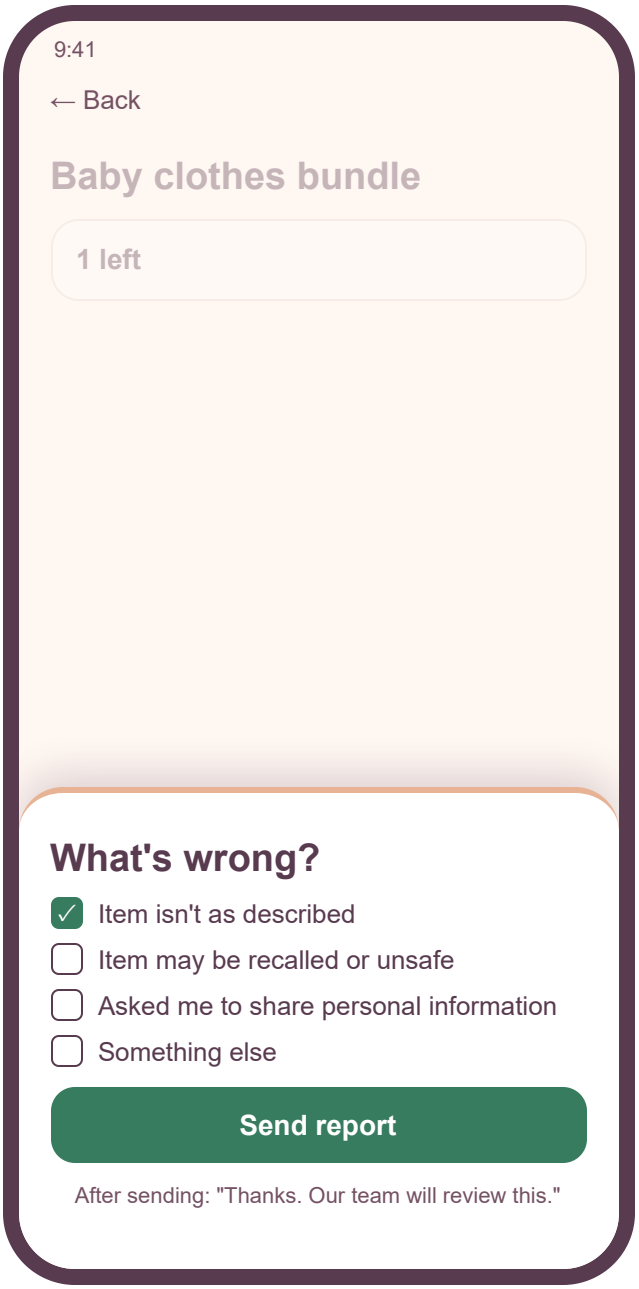

No promise of supplies or acceptance. Source and date are always shown.

23. Reach out: demo preview

Ticket 18

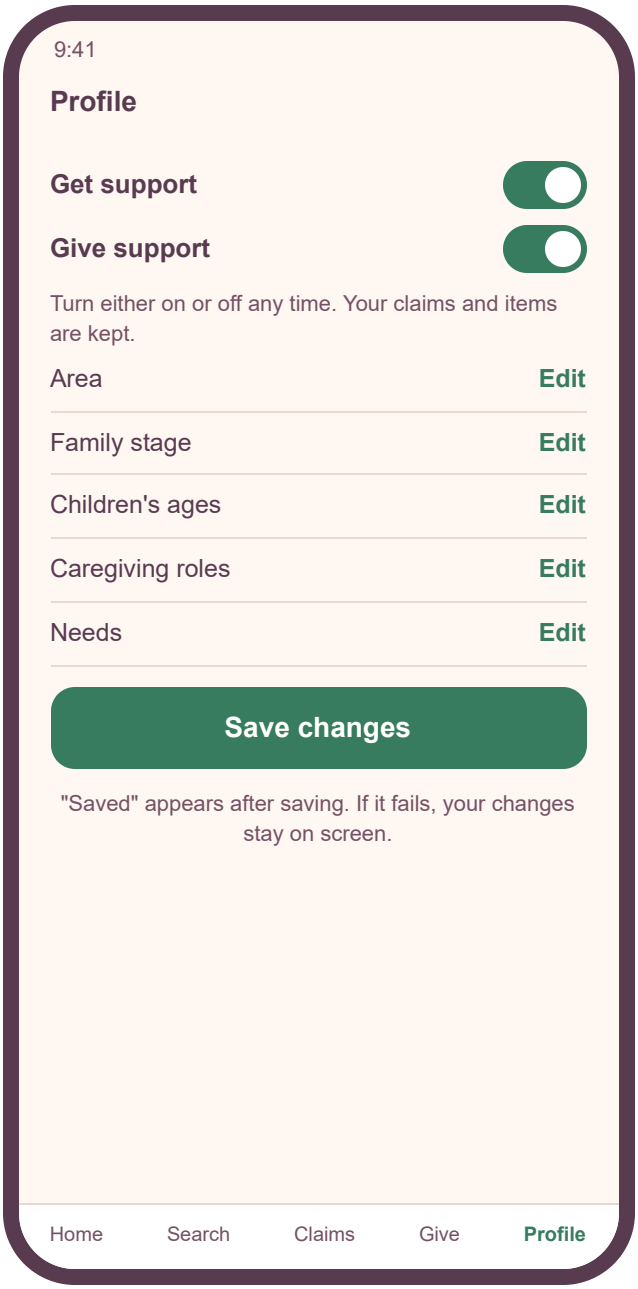

Never says "Request sent."

24. Report a problem

Ticket 19

Available on every item and organization page.

25. Edit profile and switch roles

Tickets 4, 21

One account, two roles. Changing answers changes the results.

Design notes for Figma

Use these as a starting point. The screens are layout references, not final designs.

Frame and type

1. Screens here are 300 × 624 px inside a phone frame. In Figma, start with a 390 × 844 mobile frame and scale the layout.
2. Font: Arial (replace with the team's chosen font). Titles bold 19 px, body 13 px, small text 11.5 px, labels bold 12 px.
3. Side padding 16 px. Space between cards 9 px. Button radius 12, card radius 14, chips fully rounded.

Colors (hex / RGB)

1. Deep Plum #593B50 / 89, 59, 80: text, selected chips
2. Muted Plum #745264 / 116, 82, 100: secondary text
3. Dusty Rose #B46F7C / 180, 111, 124: input outlines, accents
4. Soft Peach #E8B394 / 232, 179, 148: support arch, decoration (not for small text)
5. Forest Green #387C60 / 56, 124, 96: primary buttons, selected outlines
6. Sage Green #8AAA72 / 138, 170, 114: logo, success accents
7. Warm Ivory #FFF7F2 / 255, 247, 242: screen background
8. Sage tint #E5EBDD / 229, 235, 221 · Peach tint #F7E7DC / 247, 231, 220 · Line #EBD9D0 / 235, 217, 208 · Person badge #F1E4EA / 241, 228, 234

Components to build once

1. Primary button, outline button, small button
2. Choice chip (unselected and selected), checkbox row, toggle
3. Card (normal and selected), note box, badges (Verified, Person, Pending, Demo)
4. Text field, progress bar, tabs, bottom navigation, bottom sheet
